#### No compromise tower server

PRIMERGY TX industry standard tower servers: efficient, rock solid, record-breaking performance. PRIMERGY TX servers benefit from over 20 years pioneering work in the field of Green IT. That is how TX servers reach industry – leading performance per watt ratios, lowering the environmental impact and running costs. TX servers can easily be managed via the free of charge PRIMERGY ServerView Suite, saving IT admin costs. That's efficient performance. Our made-to-measure service packages take care of your system every step of the way. Rest assured, PRIMERGY TX servers are put through 5000 boot cycles - that's rock solid performance. PRIMERGY TX servers are flexible systems capable of using up to two processors and up to 20 hard disks. Tower to rack mounting kits are available for most TX systems to help you move to a consolidated rack infrastructure. TX servers have a tradition of setting record-breaking performance levels. So, whether you use them as tower or rack servers, for file, print or application purposes, you will benefit from record-breaking performance. PRIMERGY TX: a tower of strength.

PRIMERGY TX300 S6

Are you looking for business continuity, especially for your core business applications? The new TX300 S6 offers maximum levels of availability and expandability as a result of hot plug, redundant versions. It has powerful performance features as supplied by the leading Intel® Xeon® processors 5600 series together with an 8-port SAS 2.0 controller and fast PCIe Gen2 connections. Continuity is ensured as a result of the modular RAID, redundant Dual LAN features and optional redundant hot-plug power supply and fans. The "Cool-safe™" technology in the new honeycomb design ensures optimal temperatures

despite peak workloads and thus ensures long-life. Optimal performance and high energy efficiency is achieved via a highly efficient power supply (92% energy efficiency), a largely no-cable motherboard and state of the art power management features. The PRIMERGY TX300 S6 has 18 DIMM slots for memory mirroring with up to 192 GB DDR3 RAM. The PRIMERGY TX300 S6 is exactly the right platform for business-critical remote sites.
